Allowable Subject Matter

Claims 1-81 are allowed.

The following is an examiner's statement of reasons for allowance:

The invention is directed to selecting criteria for screening the selection of stock wherein the selected criteria consists of a buyback ratio and at least one of price/sales ratio and a price/earnings ratio for each stock; screening the selection of stocks, the screening process including identifying the stocks from the specified selection having buyback ratios, wherein a buyback ratio corresponds to a percentage of issued stock repurchased from the public during a specified period and resulting in a decrease of shares outstanding, and identifying a price/sales ratio or price/earnings ratio in the group for each such stock of a subset of the stocks having buyback ratios, wherein the subset is determined based on the buyback ratio for each stock; and ranking stocks within the subset based on the price/sales ratio or price/earnings ratio for each stock, wherein the stock having the lowest price/sales ratio or price/earnings ratio is ranked the highest.

Regarding claims 1, 10 and 19, the closest prior art Kiron et al. (US 5,806,048), does not teach screening the selection of stocks, the screening process including identifying the stocks from the specified selection having buyback ratios, wherein a buyback ratio corresponds to a percentage of issued stock repurchased from the public during a specified period and resulting in a decrease of shares outstanding, and identifying a price/sales ratio or price/earnings ratio in the group for each such stock of a subset of the stocks having buyback ratios. This uniquely distinct feature renders the claim allowable.

Art Unit: 3622

Regarding claims 21, 31, 41, 51, 61, 71 and 81, Kiron does not teach receiving a request specifying a selection of stocks from a database of stock information; identifying stocks from the specified selection having buyback ratios, wherein a buyback ratio corresponds to a percentage of shares of issued stock repurchased from the public during a specified period and resulting in a decrease of shares outstanding; and generating a report ranking a set of the identified stocks with buyback ratios based on at least one other selection criteria associated with performance of a corresponding company and generating a report ranking a set of the identified stocks with buyback ratios based on at least one other selection criteria associated with performance of a corresponding company. This uniquely distinct feature renders the claim allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
